

Ngorongoro Crater lion pop graph (KopeLion Annual report March 2016)

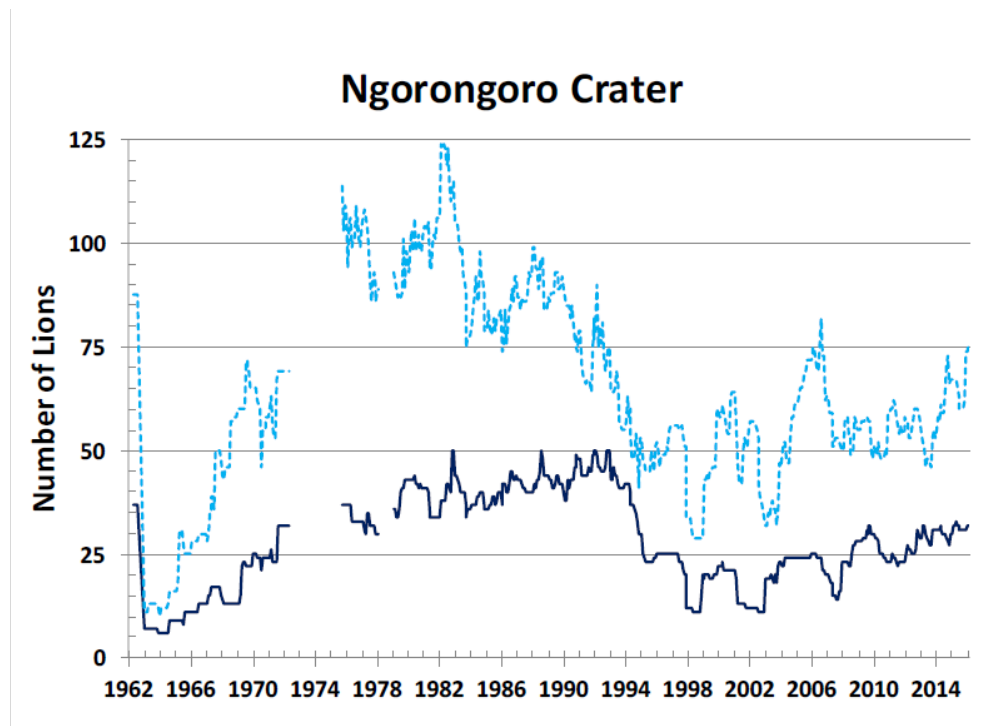

Figure 1. Monthly population totals for lions living on the Crater floor, from 1962 until 2016. Dotted blue line includes all individuals; dark blue only includes adults that are at least four years of age.

Depredation event locations & bomas (KopeLion Annual report March 2016)

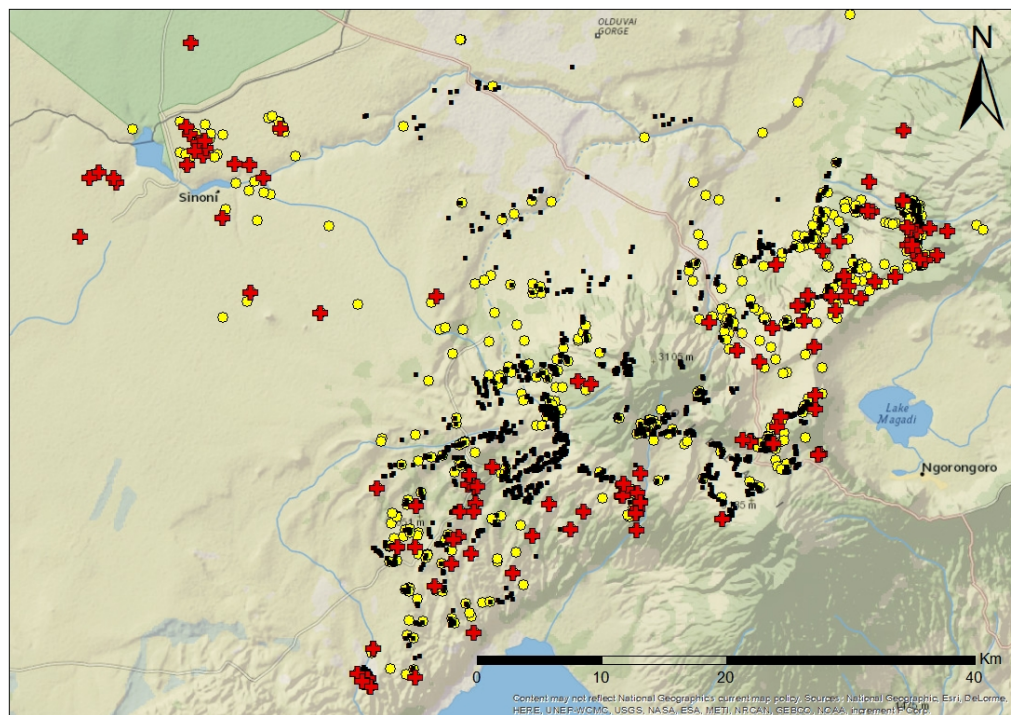

Fig. 3. Map of our study area, the central bulk of NCA, showing the locations of active bomas (located during wet season 2013; black dots), lion-livestock attacks (red crosses); and attacks from all other predators (yellow dots).
